

Tork Elevation – The new dispenser line

Lift your washroom to a new level

Lift your washroom with Tork Elevation

Tork® is proud to introduce a new line of dispensers. We have listened to your ideas and used all of our experience to develop innovations and improved functionality that simplifies daily use. All whilst saving both time and money. Available in black and white, our broad selection of dispensers offer a wide range of features that ensure the perfect solution for your washroom needs. That's what we call functional design.

The Tork dispenser for hand towel rolls (H1 system) has a high capacity that is ideal for busy washrooms found in places such as schools and airports.

The Tork dispensers for interfolded hand towels (H2 system) are suitable for environments that demand both comfort and hygiene – such as restaurants, offices and healthcare facilities.

The Tork dispensers for ZZ-folded and C-folded hand towels (H3 system) are the traditional hand towel system for high volume public environments.

The Tork dispensers for centrefeed rolls (M1 and M2 systems) offer an easy, one-handed operation whilst allowing a user to take as much paper as needed. They are the ideal systems for areas where hand drying and light surface wiping are combined – such as in food preparation and laboratory use.

Lift your washroom with Tork Elevation

Tork hand towel roll dispenser – H1 System

Art. No.	Dispenser	Capacity	Colour	Material	Height (mm)	Width (mm)	Depth (mm)	Refill Identifier
