

Stainless Steel Window Squeegee

35 cm

Art No	FCPUJH00022
Material	Stainless Steel
Uses	To perform the drying part of window cleaning process
Length	35 cm
Country of Origin	Italy

The Stainless Steel Window Squeegee is used to perform the drying part of window cleaning process. Basically the manual window cleaning operation consists of:

- › Washing part: performed by using bucket, liquid and the washer.
- › Drying part: performed by using the window squeegee.

Why Stainless Steel Window Squeegee ?

- › The Stainless Steel Window Squeegee can be fully disassembled into three main components: the supporting channel, the rubber blade and handle with a securing spring.
- › It is flexible enough to be used as scraper because the blade holder with its scraper blade can be fitted into the handle.
- › The rubber blade channel is locked into the handle by means of 2 teeth at the top of the spring that enter the corresponding holes.
- › The handle is covered by a soft rubber grip and can be fitted into telescopic poles, this increases the reach of squeegee so that you can get to the top of the window without using a ladder.
