

Cushioned matting for benches and compartments perfect for protecting delicate components and surfaces.

Keep tools and fragile equipment free from damage with Pillomat, a multi-purpose surface mat that can be used to line worktops, shelving or compartments.

Made from a tubular construction with air-filled hollow sections, it provides a lightweight surface matting solution that's quick to install, and easy to clean and maintain. The open grid ensures good drainage and fall through, and the non-porous PVC is impermeable to fluids, making it suitable for a wide range of industries, including marine compartments, manufacturing workspaces and production lines.
